				IS-71004-1	16 Sw. Frameless OLED System	$865.10
MISC	IS-S0109DEM	Single Switch Solution	LCD 36 x 24 Plug & Play Controller/Indicator Device			$99.00

Why SmartDisplay?

The SmartDisplay is a device that enables designers to create clear solutions in complex decision making environments using intuitive and programmable custom menus. NKK offers the industry's most extensive selection of off-the-shelf OLED and LCD programmable switches. SmartDisplay products combine a pushbutton or rocker switch with a graphic OLED or LCD display for a multi-function device. A comprehensive lineup is available, from a full screen OLED pushbutton to compact LCD and display options.

As demand increases for greater functionality, space conservation and long term ROI, the use of traditional switches may not be an optimal solution. OLED and LCD programmable devices streamline control panels, utilizing less space and rendering an unprecedented amount of flexibility. In addition, NKK offers a myriad of engineering kits, systems and accessories that can amplify your application.

It's not just smart – it's brilliant!
